

Nhat Pham Minh Ho

CONTACT INFORMATION	Department of Statistics and Data Sciences University of Texas, Austin GDC 7.504, 2317 Speedway D9800 Austin, Texas 78712-1823, USA	Phone: (734) 355-9907 E-mail: minhnhath@utexas.edu https://nhatptnk8912.github.io/
ACADEMIC APPOINTMENTS	Assistant Professor (tenure-track) <ul style="list-style-type: none">• Department of Statistics and Data Sciences• University of Texas, Austin, TX, USA Post-doctoral Scholar in EECS <ul style="list-style-type: none">• University of California, Berkeley, CA, USA• Mentors: Professors Michael I. Jordan and Martin J. Wainwright	2020-present 2017-2020
EDUCATION	University of Michigan , Ann Arbor, Michigan USA Ph.D in Statistics, 2012 - 2017 <ul style="list-style-type: none">• Advisors: Professors Long Nguyen and Ya'acov Ritov• Thesis: Parameter estimation and multilevel clustering with mixture and hierarchical models Master of Arts in Statistics, 2012-2013 Ho Chi Minh City University of Science , Ho Chi Minh City, Vietnam B.S in Mathematics and Computer Science, 2007-2011 <ul style="list-style-type: none">• Major: Partial Differential Equations (PDE) and Numerical Analysis• Rank: 3/3200 - <i>Summa Cum Laude</i>	
RESEARCH INTERESTS	A central theme of my research focuses on four principles of statistics and data science: heterogeneity, interpretability, stability, and scalability: <ul style="list-style-type: none">• Heterogeneity (Bayesian nonparametrics, hierarchical and mixture models)• Interpretability (model misspecification, deep generative model, convolutional neural networks)• Stability (robust statistics, (non)-convex optimization in statistical settings)• Scalability (statistical and computational optimal transport, approximate Bayesian inference, distributed computing)	
PAPERS TO BE SUBMITTED (PREPRINTS, COMPLETE MANUSCRIPTS)	(Authors of papers marked with * are equally contributed. Authors of papers marked with ** are in alphabetical order) Chiao-Yu Yang, Lihua Lei, Nhat Ho , Will Fithian. The bag-of-null-statistics procedure: An adaptive framework for selecting a better test statistics . <i>To be submitted, Journal of the Royal Statistical Society: Series B</i> . Nhat Ho** , Stephen Walker**. On efficient estimation of cumulative distribution function and its application to sampling . <i>To be submitted, Journal of the Royal Statistical Society: Series B</i> . Aritra Guha, Nhat Ho , Chiao-Yu Yang, Long Nguyen, Michael I. Jordan. Bayesian sieves for unbounded parameter space and excess mass contraction under misspecification . <i>To be submitted, Annals of Statistics</i> .

WORKSHOP ORGANIZATION *Integration of Deep Learning Theories* at NeurIPS 2018, Palais des Congrès de Montréal, Canada.
Co-organize with Professors Richard Baraniuk, Stephane Mallat, Anima Anandkumar, and Ankit Patel

INVITED SEMINAR PRESENTATIONS On optimal transport in machine learning and data sciences: computational, modeling, and theoretical perspective. *BLISS Seminar, Department of Electrical Engineering and Computer Sciences, January, 2021, UC Berkeley*. (Invited talk)

Statistical and computational perspectives on latent variable models. *Department of Decision Sciences at Bocconi University, Italy, November 2020*. (Invited talk)

Statistical and computational perspectives on latent variable models. *Young Data Science Researcher Seminar, ETH Zurich, July 2020*. (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Depart-*

ment of Biostatistics, March 2020, University of California, Berkeley. (Invited talk - Canceled)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics and Data Science, February 2020, CMU.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, February 2020, University of California, Los Angeles.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics and Data Science, February 2020, Cornell University.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, February 2020, Rutgers University.* (Invited talk - Canceled)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, February 2020, Purdue University.* (Invited talk - Canceled)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Data Science, February 2020, University of California, San Diego.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Data Science, February 2020, John Hopkins University.* (Invited talk - Canceled)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, February 2020, University of Wisconsin, Madison.* (Invited talk - Canceled)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, March 2020, University of Toronto.* (Invited talk - Canceled)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, February 2020, Duke University.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics and Data Sciences, January 2020, University of Texas, Austin.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, January 2020, University of Illinois, Urbana-Champaign.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Booth School of Management, January 2020, University of Chicago.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Data Science and Operation Research, January 2020, University of Southern California.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, January 2020, North Carolina State University.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, January 2020, University of Minnesota, Twin Cities.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Krannert School of Management, January 2020, Purdue University.* (Invited talk)

Statistical and computational perspectives on latent variable models. *Statistics Seminar, Department of Statistics, January 2020, Pennsylvania State University.* (Invited talk)

On multi-layer latent variable models: computational and statistical perspective. *Mathematics of Data and Decisions Seminar, Department of Mathematics, December, 2019, UC Davis.* (Invited talk)

On optimal transport in machine learning and data science: computational, modeling, and theoretical perspective. *Research Seminar, VinAI Research, October, 2019, Ha Noi, Viet Nam.* (Invited talk)

Statistical and computational perspective of mixture and hierarchical models. *BLISS Seminar, Department of Electrical Engineering and Computer Sciences, October, 2019, UC Berkeley.* (Invited talk-Canceled)

Singularity structures of mixture models: Statistical and computational perspective. *Department Seminar, Department of Electrical Engineering and Computer Sciences, Rice, November, 2018, Houston, Texas.* (Invited talk)

CONFERENCE,
WORKSHOP
PRESENTATIONS

Statistical efficiency of parameter estimation in generalized contaminated models. *International Chinese Statistical Association (ICSA), Xi'an University, Xi'an, China, 2021.* (Invited talk)

Convergence rates for Gaussian mixtures of experts. *International Conference on Econometrics and Statistics (EcoSta), Yonsei University, Seoul, South Korea, 2021.* (Invited talk)

Convergence rates for Gaussian mixtures of experts. *International Indian Statistical Association (IISA) Conference, University of Illinois at Chicago, 2020.* (Invited talk - Canceled)

On efficient optimal transport: an analysis of greedy and accelerated mirror descent algorithms. *International Conference on Machine Learning (ICML), Long Beach, CA, 2019.* (Oral presentation)

Singularity structures of mixture models: Statistical and computational perspective. *Joint Statistical Meetings (JSM), August, 2019, Denver, Colorado.* (Invited talk)

Singularity structures of parameter estimation in finite mixtures of distributions. *Joint Stanford/Berkeley Applied Math Event, November 2018, University of California, Berkeley.* (Invited talk)

Singularity structure of parameter space and posterior contraction in finite mixture models. *Joint Statistical Meetings (JSM), August, 2017, Baltimore, Maryland.* (Invited talk)

Singularity structures and parameter estimation behavior in finite mixtures of distributions. *Non-parametric Statistics Workshop: Integration of Theory, Methods, and Applications, October, 2016, Ann Arbor, Michigan.* (Poster)

Singularity structures and impacts on parameter estimation in finite mixtures of distributions. *Shannon Centennial Symposium, September, 2016, Ann Arbor, Michigan.* (Poster)

Singularity structures and parameter estimation behavior in finite mixtures of distributions. *Joint Statistical Meetings (JSM), August, 2016, Chicago, Illinois.* (Contributed talk)

Singularity structures and parameter estimation behavior in finite mixtures of distributions. *Conference on Statistical Learning and Data Science, June, 2016, University of North Carolina at Chapel Hill.* (Poster)

Singularity structures and parameter estimation behavior in finite mixtures of distributions. *Statistical Machine Learning Student Workshop, June, 2016, University of Michigan, Ann Arbor*. (Contributed talk)

Singularity structures and parameter estimation in mixtures of skew normal distributions. *Michigan Student Symposium for Interdisciplinary Statistical Sciences (MSSISS), March, 2016, Ann Arbor, MI*. (Poster)

Weak Identifiability and convergence rates of parameter estimation in over-fitted Gaussian mixture models. *Student Seminar, January, 2016, Department of Statistics, University of Michigan, Ann Arbor*. (Invited talk)

Intrinsic difficulties for the inference of mixing measures in finite mixtures of univariate skew normal distributions. *From Industrial Statistics to Data Science, October, 2015, Ann Arbor, Michigan*. (Poster)

Posterior concentration of mixing parameters in some weakly identifiable finite mixture models. *10th Conference on Bayesian Nonparametrics, June, 2015, Raleigh, North Carolina*. (Poster)

Weak identifiability and optimal rate of convergence of mixing measures in over-fitted Gaussian mixture model. *NSF Conference - Statistics for Complex Systems, June, 2015, Madison, Wisconsin*. (Poster)

Weak identifiability and optimal rate of convergence of mixing measures in over-fitted Gaussian mixture model. *Statistical Machine Learning Student Workshop, June, 2015, University of Michigan, Ann Arbor*. (Contributed talk)

Optimal convergence rate of parameter estimation in over-fitted finite Gaussian mixture model. *Michigan Student Symposium for Interdisciplinary Statistical Sciences (MSSISS), 2015, Ann Arbor, MI*. (Poster)

Identifiability and convergence rate of parameter estimators in exact-fitted finite mixture models. *Statistical Machine Learning Student Workshop, June, 2014, University of Michigan, Ann Arbor*. (Contributed talk)
